

Nathalie Chevreau PhD, RD Consultant

Dr. Nathalie Chevreau is an independent consultant working with Spherix in the areas of Nutrition and Food Regulation. She has spent the past 26 years lending her scientific knowledge to the research, design, development, validation and support of a long line of successful nutraceutical and cosmetic formulations.

Before starting Chevreau Consulting LLC, Dr. Chevreau worked as the chief scientist and product developer for an international marketing company that sold nutraceuticals and high-end cosmetics via direct response and prestige stores. She has developed more than 35 nutraceutical and cosmetic formulas for diet and weight loss, body contouring and skin health. To ensure that product claims were scientifically substantiated, Dr. Chevreau thoroughly and extensively reviewed and analyzed information and data from the published literature and ingredient suppliers. She has written comprehensive research summaries for each product and assembled the substantiation used to support claims and keep products on the market.

When product advertising or efficacy claims came under scrutiny from the FTC or other investigative bodies (i.e. Congressional Subcommittee on Oversight and Investigations), Dr. Chevreau's role was to defend the science behind the products.

Born and educated in France, Dr. Chevreau has been living and working in the US for over 29 years, giving her a unique understanding of both American and European business and scientific cultures. Her extensive product development experience, scientific know-how and understanding of the US dietary supplement industry and regulatory environment make Dr. Chevreau an invaluable asset to any company.

Dr. Chevreau received a BS in organic chemistry and a PhD in inorganic chemistry from the University of Bordeaux, France. She did her postdoctoral fellowship at Cornell University and has a Masters in Food and Nutrition from the University of Utah. She has been an adjunct professor in the Division of Foods and Nutrition at the University of Utah, working as a guest lecturer to students in the Master's program, to medical students and residents. She has published several peer reviewed articles and presented research posters at national conferences in the USA. Dr. Chevreau is fluent in both French and English.
