

Figure: SPX-106T reduces diet-induced body weight gain and hypercholesterolemia in apolipoprotein E (apo E)-deficient mice. (A) Body weights were quantified over the course of 10 weeks for apo E-deficient mice fed a western diet with or without SPX-106T. (B) Serum cholesterol was quantified in apo E-deficient mice after 10 weeks of consuming a western diet with or without SPX-106T.
